Attorney Docket No. 10022/112

In the Claims:

This listing of claims will replace all previous versions, and listings, of claims in the application.

Listing of Claims:

1. (Previously presented) A computer-implemented method for developing a dossier comprising the steps of:
 - (a) receiving into said computer a name of a client;
 - (b) presenting on a computer-user interface a list consisting of industries associated with the client;
 - (c) allowing selection of an industry from the list of industries;
 - (d) searching in a plurality of computer-readable knowledge repositories for information relating to the client and the selected industry; and
 - (e) preparing the dossier utilizing the information found during the searching.
2. (Previously presented) A method as recited in claim 1, further comprising a step of presenting an alternate list consisting of industries not associated with the client.
3. (Previously presented) A method as recited in claim 1, further comprising steps of displaying topics associated with the client and allowing selection of at least one of the topics for insertion of information relating to the selected at least one of the topics in the dossier.
4. (Original) A method as recited in claim 1, wherein the dossier is arranged in sections according to people, documents, and projects.
5. (Original) A method as recited in claim 4, wherein the people section is arranged according to the number of documents and projects an individual has produced related to the client or industry.
6. (Original) A method as recited in claim 4, wherein the documents and projects sections are arranged chronologically.

Attorney Docket No. 10022/112

7. (Previously presented) A computer program embodied on a computer readable medium for developing a dossier, comprising:
- (a) a code segment that receives a name of a client;
 - (b) a code segment that presents a list consisting of industries associated with the client;
 - (c) a code segment that allows selection of an industry from the list of industries;
 - (a) a code segment that searches for information relating to the client and the selected industry; and
 - (b) a code segment that prepares the dossier utilizing the information found during the searching.

8. (Previously presented) A computer program as recited in claim 7, further comprising a code segment that presents an alternate list consisting of industries not associated with the client.

9. (Original) A computer program as recited in claim 7, further comprising a code segment that displays topics associated with the client and allows selection of at least one of the topics for insertion of information relating to the selected at least one of the topics in the dossier.

10. (Original) A computer program as recited in claim 7, wherein the dossier is arranged in sections according to people, documents, and projects.

11. (Original) A computer program as recited in claim 10, wherein the people section is arranged according to the number of documents and projects an individual has produced related to the client or industry.

12. (Original) A computer program as recited in claim 10, wherein the documents and projects sections are arranged chronologically.

Attorney Docket No. 10022/112

13. (Previously presented) A computer system for developing a dossier, comprising:
- (a) a data processor coupled with a user interface adapter, a communications adapter and memory, the memory having stored thereon for execution by the data processor;
 - (b) logic that receives a name of a client;
 - (c) logic that presents a list consisting of industries associated with the client;
 - (d) logic that allows selection of an industry from the list of industries;
 - (e) logic that searches for information relating to the client and the selected industry; and
 - (f) logic that prepares the dossier utilizing the information found during the searching.

14. (Previously presented) A system as recited in claim 13, further comprising logic that presents an alternate list consisting of industries not associated with the client.

15. (Original) A system as recited in claim 13, further comprising logic that displays topics associated with the client and allows selection of at least one of the topics for insertion of information relating to the selected at least one of the topics in the dossier.

16. (Original) A system as recited in claim 13, wherein the dossier is arranged in sections according to people, documents, and projects.

17. (Original) A system as recited in claim 16, wherein the people section is arranged according to the number of documents and projects an individual has produced related to the client or industry.

18. (Original) A system as recited in claim 16, wherein the documents and projects sections are arranged chronologically.
